INFORMATION BULLETIN

No. M 4-III/30
M 6-III/28
M 332/57
M 337/52

CONCERNING: Using of the 100 octane fuel with 0,079% content of T.E.O.

REASON: The documentation for the M 4-III, M 6-III, M 332 and M 337 engines prescribes the fuel of minimum value of 72 octane. The upper limit of the octane value is not limited.

ACTIONS: We do not recommend at all to use the fuel with T.E.O. for the M 4-III and M 6-III engines, while for M 332 and M 337 the ethylisation of fuel up to maximum concentration of 0,08% is permitted.
Therefore we agree that the 100 octane fuel with content of T.E.O. of 0,079% is used for the M 332 and M 337 engines.
